

Dear 42Heilbronn Team,

I'm **Rustamjon Yusupov** and during my piscine I was really interesting in becoming one of your students and really wanted it, and now I'm almost your student and I'm very happy about it. I'm the guy that always motivated and if I start something, I will reach the end, if I set myself a goal, no matter what it takes, I will use all my possibilities to achieve this. The thing that always motivates me is my parent's trust for me, and I will never let them down.

I believe that my true commitment to the 42Heilbronn will be highly appreciated by the 42Heilbronn Team. I believe that the scholarship would provide me with the financial support I need to continue my studies. I grew up in a middle class family and the only financial help I ever received was from my parents. They sponsored me and my siblings throughout our education. They strive to make sure that we are given an education that was somehow unattainable due to difficult circumstances. Thanks to my determination and the hard work I put in, I graduated from high school and became one of the top students in my class, and I studied three years in medical college in Uzbekistan and couldn't imagine myself as a doctor it was very boring and not interesting for me then I decided to choose programming which was the best decision I ever made. I applied to one Polish university and recently got my degree of computer engineer. At university I learnt basics of some programming languages like: Html, CSS, Java and SQL. There I learnt how to write a code, but at 42Heilbronn I learnt something better like working with the team, learnt to never give up, improved my communication skills and writing clean code and I love one quote: *"Any fool can write a code that computer can understand, Good programmers write a code that humans can understand"*, the most interesting thing is: everything I learnt took only 27 days. That's why I want to join as a student in 42Heilbronn I just want to finish what I started.

My family and parents are not able to finance my costs because the average salary in my country is 300\$ and almost all of our family income can only cover the cost of our family. I really hope and want a scholarship, it will give me the opportunity to focus on my study and help pave the way for my future career and achieve my life and academic goals. It will also give me real freedom to study without worrying about future financial burdens and ultimately save my parents the psychological stress of not being able to support their son during my studies. I perceive this opportunity as an exceptional opportunity to interact with students from a wide variety of cultural from around the world.

Finally, I would like to point out that I am a very driven person and I will make the most of this scholarship opportunity. I firmly believe that being a student at 42Heilbronn will not only help me in my career, but will also give me the necessary tools to reach my full potential. I

sincerely thank you for considering my scholarship application and look forward to a positive response.

Sincerely yours, **Rustamjon Yusupov**
